

Transform Your Learning Environment through BYOD, mobile and cloud-based Video Applications

Wayne Boxall, Solutions Engineer, Polycom Australia

The BYOD movement

Almost two-thirds of students aged 10 to 12 and 90 percent of those 14 to 17 have a cellphone, while smartphone usage is at 44 percent for secondary students and 49 percent for college students.

Collaboration Trends & Emerging Technologies

COLLABORATION IN THE CLOUD

By 2012, 40% of enterprises will leverage cloud to meet UC needs; >30% of interactive video collaboration will be cloud-based

900

Million
Tablets

MASS MOBILE

In 2011, 1 billion tablets were sold worldwide against 69.7 million in 2010. That is expected to increase to 1.5 billion by 2015

SOCIAL COLLABORATION GROWTH

By 2016, social technologies will be integrated with most business apps; social platform market projected to grow nearly 400%

Web
3.0

EMERGING WEB-CENTRIC TECHNOLOGIES

In 2013, emerging technologies (RTC, HTML5, SVC) will make video collaboration browser-based and inherently mobile

Gartner forecasts tablet shipments will increase by 67.9 per cent this year compared with 2012!!

Polycom Solutions for Education

Solutions : Solutions by Industry

Next-generation learning for the road ahead.

Polycom enables a rich learning experience for students and educators - from public school classrooms to the world's top universities.

Overview | Benefits | Customer Stories | Resources

Education today faces major changes as primary, secondary, and tertiary educators address global opportunities, challenges, and needs. Your education institution must develop students as global citizens. It must also meet organizational imperatives to operate more efficiently and deliver programs that attract talented students and faculty from throughout the world.

"Through Polycom's solutions, we've seen teachers share ideas, conduct Continued Personal Development sessions with staff between schools, and develop excellent international links. It would be fantastic to have all schools kitted out with video conferencing solutions."

- Alan Cameron, Education Officer, Dumfries and Galloway Council

Polycom provides rich, interactive visual solutions that improve all facets of education—from student administration to course development to curriculum delivery to content management. Polycom RealPresence video solutions along with our tailored education programs and content make rich blended learning a reality even for the most challenged budgets, giving teachers the tools to engage students with more interactive and innovative educational experiences. The technology pays for itself by reducing administrative costs and improving staff productivity.

"Collaborating with author, Jim Stowell, had the biggest impact on students & my teaching career."
Marycay Densmore, Mesa Verde MS, San Diego, CA

Overview | Resources

Content Searchable Database

Polycom provides a free searchable content database offering educators worldwide access to more than 2200 programs from content providers. Updated daily, the database contains content provider educational outreach programs from organizations such as zoos, museums, author's experts in the field and much more. Polycom partners with Berrien RESA to bring you this database.

Collaborations Around the Planet

Polycom CAPspace is a free directory that is open to all educators who use video conferencing technology. It provides access to over 12,000 professionals from 42 countries and includes an unlimited number of lessons throughout the year that educators can integrate into their curriculum. From the CAPspace site, educators can search, identify, and request participation in special projects, classes, and workshops or provide a listing of the lessons they would like to share worldwide.

Education Community

The Polycom Community
Learn, Share, Connect

Join in online conversations with Polycom's Education Team and fellow educators through the Polycom Education Community, a newly launched external site that promotes the exchange of ideas in an informal environment. The community can also be used to share best practices, lessons learned, and pedagogical approaches or seek help.

Education Honors Program

The Polycom Education Honors Program is a comprehensive program specifically designed to provide educators access to specialized application training, and mission critical content and collaborative resources.

Polycom Content Access Program (PCAP)

Educators can enhance their curriculum, connect with colleagues and peers, and expand the reach of their classroom with live, relevant and culturally rich interactive learning experiences. Polycom Content Access Program (PCAP) is designed for Polycom customers who have never or seldom connected with content providers such as museums, science centers, and authors to experience the power of this educational tool.
